

Benchmarking Report Card 2021-22

This is the benchmarking report card for your school. It captures highlights of your school's spending compared with a small number of schools that share similar characteristics. The report card draws on published spending and staffing data from 2021-22 for local authority-maintained schools.

The first column in each chart shows your school. The school in the second column is the similar school that is geographically closest to your school. The remaining schools are those most statistically similar based on your school's free school meals (FSM) and special educational needs (SEN) rates. Primary, secondary, and special schools are only compared with one another.

The report card can be used to stimulate discussion within the school leadership and governance team to discover where resources may be used more effectively, and to prompt more sharing of best practice among schools.

The report card might prompt you to look at the following:

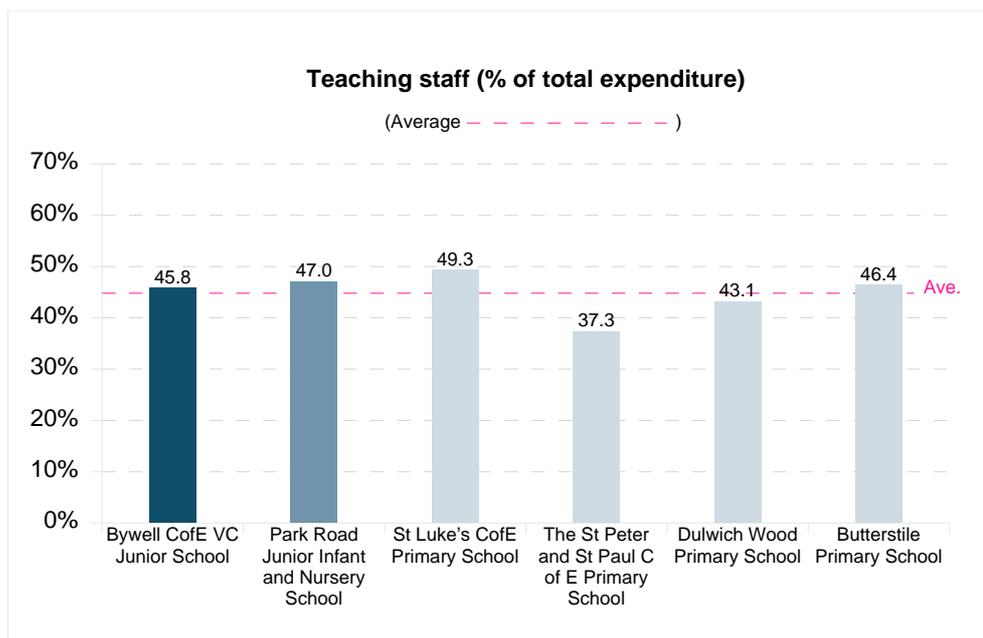

- Why are you spending more in a particular category than similar schools? Could you be more efficient or do you have unique circumstances compared with those schools?
- What might you do to achieve the greatest efficiency in that category?
- What could you learn by contacting the similar schools?

You can also use the [schools financial benchmarking service on GOV.UK](#) to compare similar schools' spending in more detail. This allows you to make a wide range of comparisons with other schools on different categories of spend, choose the criteria to identify schools to compare with and produce customised reports.

You can find further guidance and tools on school resource management [on GOV.UK](#).

Areas of interest for all schools

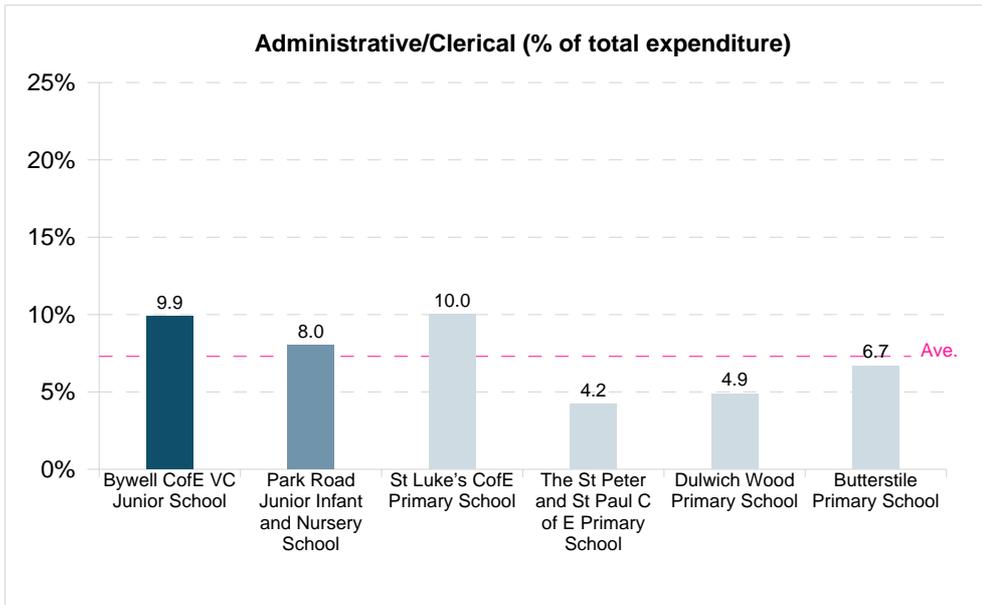

These charts identify areas that are likely to be relevant to all schools in ensuring they make the best use of their available resources.

Your current expenditure on teaching staff is above the average for your comparison group by 1.0 percentage points.

There is some evidence that greater relative spend on teachers tends to be associated with higher attainment. Of course, simply spending a greater proportion of a school budget on teaching does not guarantee results. The most efficient schools deploy their workforce effectively; taking care to review their staffing structures, focus on improving the quality of teaching and consider the best use of teachers' time

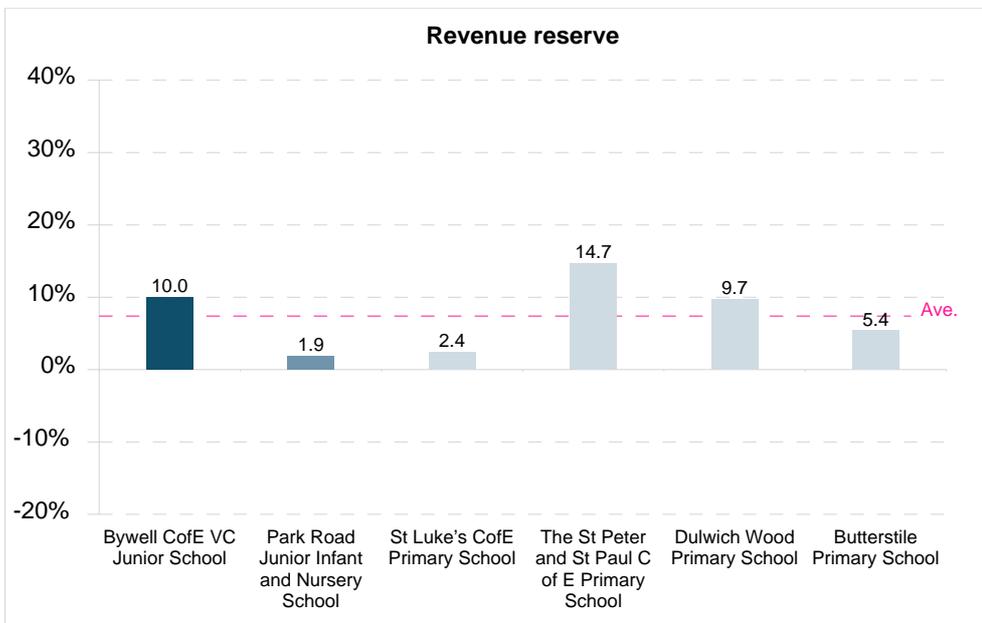

Given that spending on teachers makes up the majority of school spending, it's especially important to make sure you're managing your resources in the best way possible.

Your current expenditure on administrative/clerical functions is above the average for your comparison group by 2.6 percentage points.

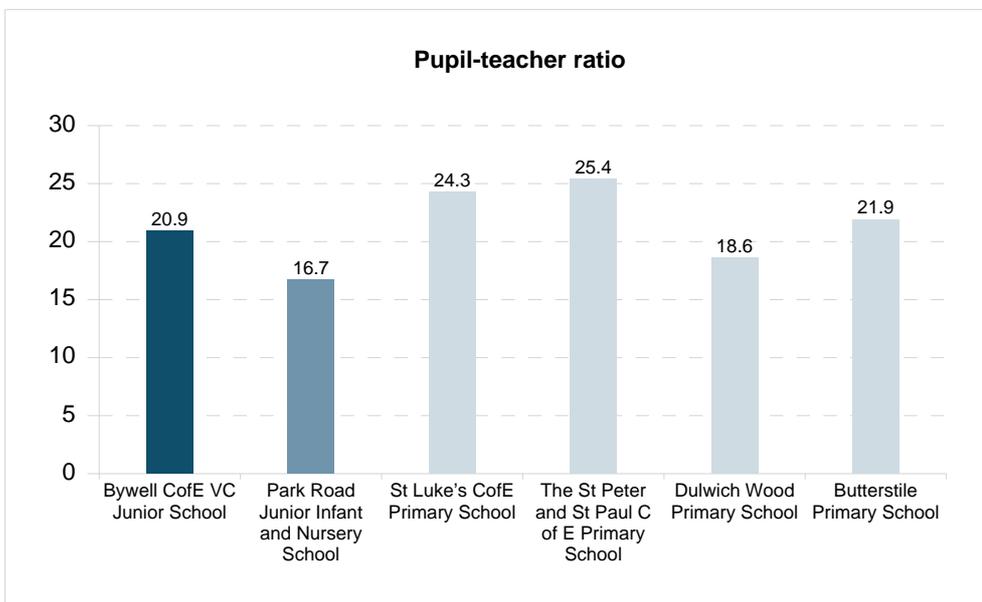

This category refers to spend on administrative and clerical staff, administrative supplies and bought-in services such as legal and auditor costs.

Efficiencies in administrative/clerical expenditure could be made by upskilling staff, changing professional services supplier or reducing waste. Greater collaboration can also achieve greater efficiency and increase buying power. For more procurement guidance please click [here](#).

Your current revenue reserve is above the average for your comparison group by 2.6 percentage points.

Keeping a modest level of revenue reserves from year to year is prudent, but if a school or trust is building up a substantial surplus there should be a clear plan for how it will be used to benefit pupils.

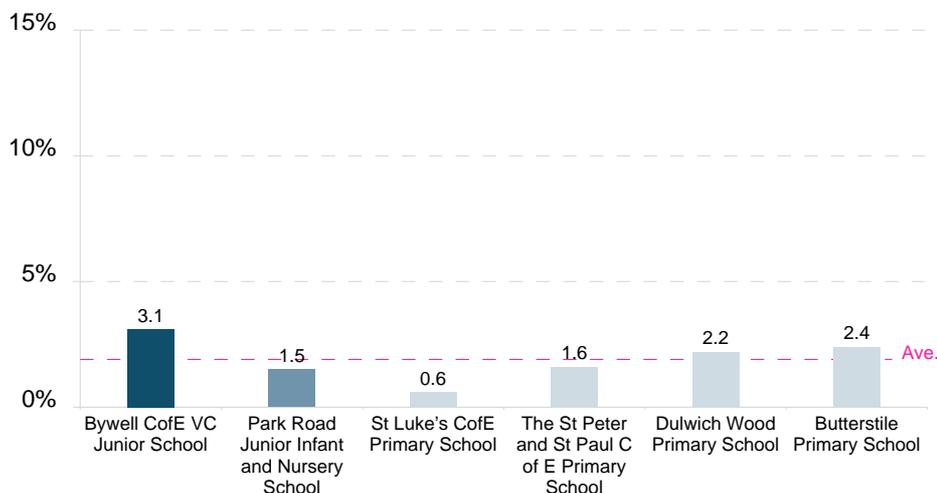

This graph shows the number of pupils to teachers. When reviewing staffing structures schools should consider pupil-teacher ratios in comparable schools, as well as allocation of classroom-based support staff.

Areas for further investigation

The following areas have been identified as ones where your school may be able to improve the use of available resources. These are the expenditure categories where your expenditure is highest compared with the average of your comparison group.

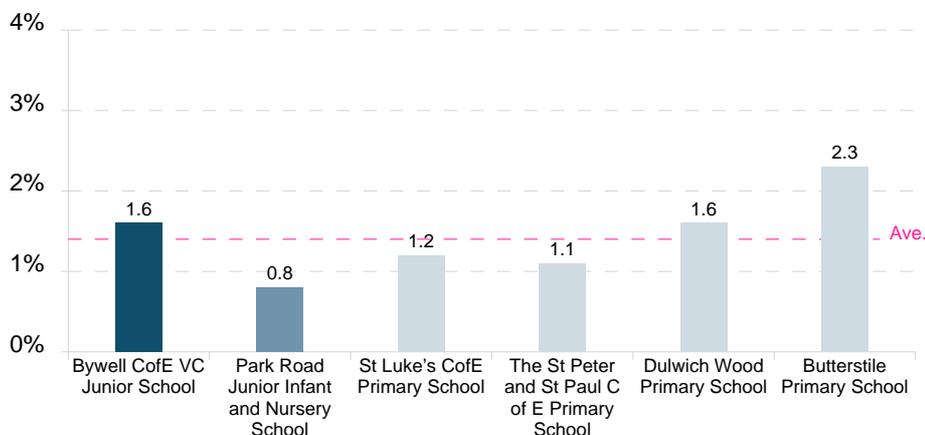

Supply staff (% of total expenditure)

Your current expenditure on supply staff (after deducting any receipts from supply teacher insurance) is above the average for your comparison group by 1.2 percentage points.

Regular review of supply arrangements and research into similar schools' approaches and contracts could help increase value for money (including by collaborating with other schools, for example to negotiate down agency fees).

ICT learning resources (% of total expenditure)

Your current expenditure on ICT resources is above the average for your comparison group by 0.2 percentage points.

Procurement guidance including guidance on cloud computing services can be found [on GOV.UK](https://www.gov.uk).

It is particularly important with ICT spending that there is a clear plan and review process to ensure that investment has a positive impact on pupil attainment.

Your comparator schools

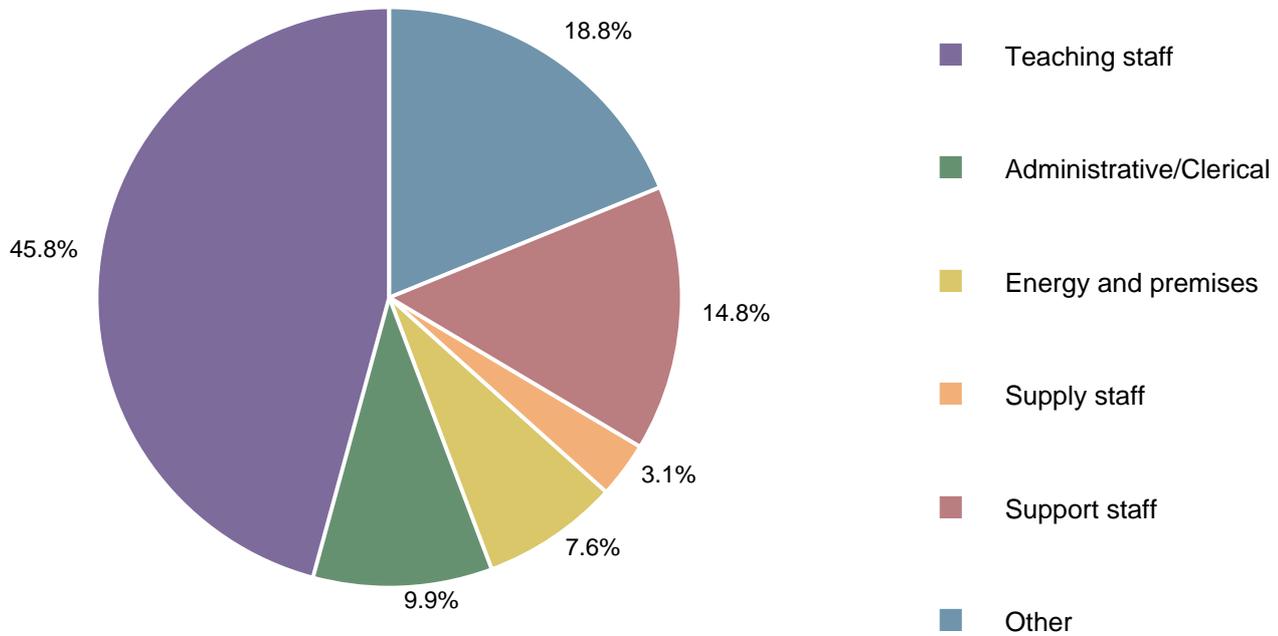

The following schools have been chosen on the basis that they have the most similar contextual information. The first comparator in the list is your school, the second is the closest school with similar SEN and FSM data, and the remaining schools are those of the same type with the most similar SEN and FSM data to yours.

School Name	LAESTAB	FSM %	SEN %	FTE pupils	Distance in miles	Spend per pupil (pounds)
Bywell CofE VC Junior School	3823009	27.4	16.0	380	N/A	5,156
Park Road Junior Infant and Nursery School	3822066	28.4	16.5	194	1.5	6,285
St Luke's CofE Primary School	3803021	27.1	15.9	207	9.3	5,826
The St Peter and St Paul C of E Primary School	9253118	27.4	15.9	208	85.0	6,253
Dulwich Wood Primary School	2102365	27.4	15.9	372	169.4	6,759
Butterstile Primary School	3512027	27.0	15.9	392	30.4	5,808

The following charts provide a summary of the school's total expenditure split into 6 high-level categories.

We have also included a summary of total expenditure of the most local similar school. For a more detailed comparison please also use the [schools financial benchmarking service on GOV.UK](#).

Expenditure: Bywell CofE VC Junior School

Expenditure: Park Road Junior Infant and Nursery School
